Examples of BibTex

Joseph E. Sutton

May 8, 2009

1 Introduction

This \LaTeX{} document show you how to use the BibTex tool.

2 Want to know more?

First build your \LaTeX{} document, it will give lots of warnings this is normal. Then execute the BibTex tool. It will creates a list of references based on citations in your paper. It will automatically exclude unused papers. Once it has compiled with no errors, build the \LaTeX{} document twice to link the citation to the references.

Here are a few examples of citations using BibTex:

• An Optimization of Source Identification Algorithm[3].
• A Time-Series Intra-Video Collusion Attack[1].
• Multiple Chemical Plume Tracing and Source Identification[2].
• Design of Source Identification Zones[4].
