

**COME TO THE PRESENTATION  
ON NETWORK SECURITY**

**An Artificial Immune System  
for Detecting Zero-Day  
Attacks against Web Servers**

**Friday, November 18<sup>th</sup>  
3:15pm in Sci III 311**

Dr. Danforth will be giving a practice presentation for USENIX LISA 2011 on her research into artificial immune systems for detecting malicious web server requests. This technique uses genetic algorithms and classifiers to discover the malicious requests in network traffic.
