### Introduction to Arduinos

The IEEE Student Branch would like to host an Arduino Workshop! An arduino is an open-source electronic platform of hardware and software. Arduino boards are able to receive inputs and turn them into outputs.

As an intro, we would like to start off with the Traffic Light Controller. Depending on how much time we have, we will add to the project as we go. We hope to see you there!

### Introduction project with Arduino

- Traffic Light Controller Project
- No experience required
- This is a free event, and everyone is welcome!
