

What is the name of your website?

- Andrew Burt's Photos

What is your website about?

- Host a gallery of my photos that can be uploaded from any device and be accessed in a nice and neat layout.

What is the purpose of the website?

- Host the gallery for my photos.

Who is your target audience?

- The target audience, is myself along with friends and family.

What information will you have on your homepage?

- The homepage will include a link with a mock login page that will allow you to upload to the site. It will also display the gallery.

What features will you have within your website?

- The website will have a login page that allows me to upload my photos to the site and will include a gallery that can be viewed by anyone that visits the site. I also hope to add a guest only site that doesn't include a login page so that guests can view the specific photos.

What do you want visitors to do once they're at your site?

- I want them to be able to view photos on the site.

What types of actions do you want your visitors to take within your website?

- I want visitors only to be able to scroll and be able to sort the photos by most recent or in a date range.

How many pages of content will need to be developed and what is the purpose of those pages?

- There will be four pages, with plans in the future to allow multiple users to upload photos with their own galleries.

What is the layout theme of your website?

- I hope to have a modern theme.

What colors will you be using for your overall theme?

- The colors on the site I hope to have slate accents. I'm not sure exactly my overall theme at the moment, but I wish to have a mostly light or dark skin.

What style of page navigation will your website have?

- The page will include a navigation bar.

Are there websites that already exist which are closely related to yours? What are they?

- Websites that are similar to my site is imgur, and/or any type of public photo uploading service.

What types of things do you see on other websites that you would like to incorporate within your website? Will you?

- I would like to add a login system of some type, but it would have to be a mock behavior, but I will need to see if I wish to add this for the final project.

What makes your website similar to others?

- Ability to upload and view pictures.

What makes your website different from others?

- It will be hosted on my own server, and this will allow me to upload more than just photo.

What more can you state about your website?

- I hope to make this on my own vpn, to add more functionality than I will be able to add on sleipnir.
