California State University – Bakersfield

Useful Completed Coursework/programming languages used:

- o **Algorithm Analysis – C++**
- o **Web Programming – HTML, PHP, PostgreSQL**
- o **Software Engineering – C++**

Programming Projects Completed/Current, Academic Year 2017-2018:

- ❖ **Database Project/**

Work History

2018
Valet / LAZ Parking, Los Angeles CA

- Speed: Customers want their cars quickly and don't want to wait. Being able to quickly run back and forth to the car is key.
- Hand-eye Coordination: Valets will be driving someone else's car, and need to be careful.
- Customer Service: Valets need to be courteous to drivers and responsive to their needs. Good customer service means good tips.
- Stamina: Valets spend most of their time on their feet, running back and forth to cars.

2018

Cook / Popeye's Louisiana Kitchen, Bakersfield CA

- Promptly report any maintenance and repair issues to General Management.
- Maintain smooth and timely operations in preparation and delivery of meals and kitchen sanitation.
- Ensure all staff understood expectations and parameters of kitchen goals and daily kitchen work.
- Manage kitchen staff by orienting, training, assigning, supervising, evaluating when necessary.
- Achieve and exceed performance, budget and team goals.
